Serial No. 10/042,488

Art Unit 1713

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-18 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Odell, U.S. Patent 5,487,965 or Dada et al., U.S. Patent 5,328,972.

The Odell patent teaches processes for preparing polymeric compositions in a supercritical fluid medium, see column 1. The step of homogeneously blending and dispersing additives is rendered obvious from the disclosure at columns 8-10. Releasing the pressure as required by the claim is rendered prima facie obvious by the recognition by one of ordinary skill in the art that the composition would achieve atmospheric pressure at the conclusion of the preparation of the composition. As such, it would seem that the pressure is at that point released.

The Dada et al. patent also shows processes for blending of polymer products and additives within the polymeric products in supercritical fluids. See columns 3 and 4. The same rationale

Serial No. 10/042,488

Art Unit 1713

applies here with respect to the releasing of the pressure of the fluid once the blending step is completed. As such, applicants' claim limitations are seen to be rendered <u>prima facie</u> obvious.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter D. Mulcahy, whose telephone number is (703) 308-2449. The examiner can normally be reached on Tuesday through Friday from 7:30 A.M. to 6:00 P.M.

The fax telephone number for this group is (703) 872-9306.

Any inquiry of general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-2351.
